

IN PARTNERSHIP WITH

FOUNDATION FOR SARCOIDOSIS RESEARCH

WHO WE SERVE

All individuals and loved ones of those impacted by sarcoidosis.

OUR VISION

The pursuit of a world without sarcoidosis.

OUR MISSION

The Foundation for Sarcoidosis Research (FSR) is the leading international organization dedicated to finding a cure for sarcoidosis and improving care for sarcoidosis patients through research, education, and support. Since its establishment in 2000, FSR has fostered over \$6 million in sarcoidosis-specific research efforts.

How skin conditions **IMPACT** patients

Sarcoidosis is a rare inflammatory disease characterized by the formation of granulomas—tiny clumps of inflammatory cells—in one or more body organs. When the immune system goes into overdrive and too many of these clumps form, they can interfere with an organ's structure and function. When left unchecked, chronic inflammation can lead to fibrosis, which is the permanent scarring of organ tissue.

FOUNDATION FOR
SARCOIDOSIS RESEARCH

OUR STORY

FSR was founded nearly 25 years ago by a women diagnosed with sarcoidosis and her husband to help accelerate research and provide support for those impacted by sarcoidosis.

HOW WE MAKE AN IMPACT

FSR provides patients with education, support, and wellness programming. We host the largest international patient and caregiver summit.

We also educate and have built a robust network of clinicians through the FSR Global Sarcoidosis Clinic Alliance, consisting of over 40 clinics across 25 states.

FSR has funded over 6 million to advance the understanding of sarcoidosis. And we work with federal agencies and regulators to ensure all patients have access to the care and treatment they deserve.
