

# PRIOR AUTHORIZATION & ASTHMA

Timely access to treatments is **crucial** for respiratory patients.

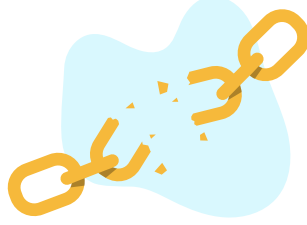

But **prior authorization** often gets in the way.

**Prior authorization can:**

Delay access to life-saving treatment

Disrupt consistent care

Force clinicians to spend more time on paperwork than patients

**Policymakers can protect patients** and ensure swift access to asthma care.

**Good policies may:**

Require response windows

Limit reauthorization requests

Simplify the appeals process

**ASTHMA PATIENTS DESERVE ACCESS TO TIMELY CARE.**
