

IN PARTNERSHIP WITH

WHO WE SERVE

Allergy & Asthma Network is patient-centered. We serve people living with asthma, allergies, eczema (atopic dermatitis), and related conditions. We work with health professionals: allergists, pulmonologists, asthma educators and respiratory therapists. And we partner with industry to ensure patients are aware of available treatments.

OUR VISION

Allergy & Asthma Network's goal is simple yet profound: to end needless death and suffering, empower people to take control of their health and well-being, and make healthcare more inclusive, equitable and accessible for people living with these conditions.

OUR MISSION

The mission of Allergy & Asthma Network is to end the needless death and suffering due to asthma, allergies and related conditions through outreach, education, advocacy and research.

How skin conditions
IMPACT
patients

Asthma, allergies, and eczema (atopic dermatitis) are allergic diseases. Severe allergies can cause hives and atopic dermatitis can cause an itchy painful rash. When people with atopic dermatitis are exposed to allergens and irritants, it can trigger symptoms. It can also impact daily activities and quality of life.

OUR STORY

Allergy & Asthma Network was founded in 1985, when a mother of a young daughter with severe asthma and allergies had difficulty finding patient-friendly information. What started as a grassroots effort has grown into a leading nonprofit patient-centered network with the goal to improve health and quality of life for people affected by these conditions.

HOW WE MAKE AN IMPACT

Allergy & Asthma Network specializes in making accurate medical information relevant and understandable to all while promoting standards of care that are proven to work. We believe that integrating prevention with treatment helps reduce emergency healthcare visits, keeps children in school and adults at work, and allows participation in sports and other activities of daily life.

We bring the patient voice to meetings and conferences about medication development, regulatory issues and discussions about chronic disease management. You can find us advocating for effective healthcare policies on Capitol Hill or at professional conferences meeting with allergists.

AT A GLANCE HOW WE PROVIDE SUPPORT

We provide support by going into communities to establish partnerships with trusted leaders. People with asthma are invited to enroll in virtual asthma coaching, a free 6-week series of 1-on-1 online sessions with a certified asthma educator.
