COALITION OF SKIN DISEASES

Advocating for the 84 million Americans living with a skin condition

All Photosensitive Related Conditions

IN PARTNERSHIP WITH

SHADOW JUMPERS

WHO WE SERVE

Shadow Jumpers serves children, individuals, and families affected by rare conditions that cause severe photosensitivity or intolerance to sunlight. Our community includes people living with conditions such as Photosensitive Porphyria (EPP, XLP, CEP), Xeroderma Pigmentosum (XP), Solar Urticaria (SU), Polymorphous Light Eruption (PMLE) and more.

OUR VISION

We envision a world where photosensitivity never prevents individuals and families from experiencing the moments, opportunities, and connections that make life meaningful, where everyone affected by the sun can live confidently, participate fully, and feel supported by a community that understands.

OUR MISSION

Shadow Jumpers' mission is to empower individuals affected by rare and chronic photosensitive conditions, and their families, to live fuller, more connected lives by providing practical support, meaningful experiences, education, financial assistance, and a community that understands their unique challenges.

How Photosensitivity **IMPACTS** patients

Photosensitive conditions can profoundly impact daily life, making ordinary exposure to sunlight painful, dangerous, or medically harmful. Patients may face limitations in school, work, travel, recreation, and relationships, requiring constant planning and protection while often experiencing isolation, anxiety, financial burdens, and reduced quality of life.

SHADOW JUMPERS

OUR STORY

Shadow Jumpers was founded in 2017 to support families navigating life with rare photosensitive conditions. What began as an effort to help families experience moments made difficult by the sun has grown into a community providing direct assistance, protective resources, accessible experiences, education, advocacy, and connection for photosensitive families.

HOW WE MAKE AN IMPACT

Shadow Jumpers makes an impact by removing barriers created by photosensitivity. Through direct financial assistance, sun-protective resources, accessible experiences, family programming, education, advocacy, and community connection, we help individuals safely participate in everyday life, create meaningful memories, reduce isolation, and feel empowered to live beyond the limitations of the sun.

AT A GLANCE

HOW WE PROVIDE SUPPORT

Shadow Jumpers supports the photosensitive community through direct financial assistance, sun-protective clothing, home and vehicle modifications, sun-safe family experiences, community events, and programs designed to help individuals and families safely participate in experiences that might otherwise feel out of reach.
